Weaknesses: he's French

Armed with the silver bullet front pin, Jean executes with PPC* - Power, Precision and Conviction. Don't beat yourself up too much if you let shot after shot through your iron-gated defence, it is not your fault. However, be prepared to take an ego bashing if you are unfortunate enough to be his opposition. How to wind him up? - defend 3-in-a-row and that's when YOU start having fun! He can be just as effective in defence - watch out for those 'crazy shots' from the back though. When under pressure and frustrated (for whatever reason!?.i try not to ask too many intimate questions) the shots get harder and harder. Keep your eyes peeled for his trade mark off the wall random rebounds. Other intimidation tricks...tries to carry off the 'hard man' look unconvincingly, you need only scratch the surface before reaching the soft centre.
